

WE CAN MAKE IT

Inspired by the struggle this pandemic has caused our industry, I wrote a song and put a call out on Facebook for my fellow PNW artists to collaborate on it. That call was answered quickly by 10 other artists and together we collaborated on what is now a beacon of hope...our anthem, "We Can Make it!" This song was written, collaborated on, mixed and mastered in five days. We dedicate this song to all of our fellow artists and industry peers who have been deeply affected by this pandemic. Collectively, our goal is to shed light on hope and remind our fellow human beings that we can make it through any obstacle...together. Our true power shines when we come together as a community selflessly to love one another.
